IT engineer

Our company

Neplan AG is one of the leading companies worldwide in the development of Analysis Software for electrical, gas, water and district heating networks. Our Software NEPLAN® is successfully used in over 110 countries by electrical utilities, in industrial and generation plants, by consulting and engineering companies and universities.

We are seeking an IT-, which supports us to develop a Software with client-server architecture and has the following skills:

- Development environment Microsoft Visual Studio .Net
- Programming languages: C#
- Experience with web- or mobile-programming
- Experience with SQL-Server and/or Oracle
- Expertise in Java Script, HTML 5, Angular, Typescript is an advantage

You can expect an environment of domestic and foreign engineers in a growing company that leaves you a lot of freedom and independence.

About you

You have a EU citizenship and own a master degree in IT-engineering. You have a quick mind, are used to work independently and effectively and are excellent in speaking English and/or German.

We offer you

- an interesting and varied job in an international and forward-looking market
- personal responsibility and opportunities for creativity in a reasonable and competent team
- a charming work place in Küsnacht on the right side of Lake Zurich with excellent train connections

We are looking forward to meet you personally. Please send us your written application per regular mail or Email to
